

Technology Academy | Code Club

Code Club 2 | HTML/CSS

Overview:

I own a Lolly Shop and I've hired you to turn my wireframe into a web page using HTML and CSS.

Task:

Using HTML and CSS, recreate the wireframe below. Use the tools available to you to make your replication as close as possible.

If you have additional time, try making your webpage responsive.

Visual Resources:

Additional Information:

The wireframe is a static website. The tiles do not link to anything.

Outcome:

A replication of the image above.

Each team will have 5-10 minutes to share their work and walk through some of their coding decisions.
